

Project Initialization and Planning Phase

Date	30 September 2026
Team ID	SWTID-2026-8779
Project Name	PocketSmart AI – Your Smart Budget & Recommendation System
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

I am a user who wants to plan my budget for different personal needs, but I find it difficult to choose suitable products and manage my expenses within my budget. I am trying to make smart and affordable decisions for home interiors, parties, and jewelry, but existing options may require searching across multiple sources and comparing many choices. Because I need personalized recommendations based on my budget, requirements, preferences, and occasion, I want a simple smart system that helps me plan my spending and provides suitable recommendations, which makes me feel confident and organized about my purchase decisions. Table at the bottom.

Example:

PocketSmart AI – Customer Problem Statement

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A user who wants to manage personal expenses	Plan my budget and find suitable recommendations for home interiors, parties, and jewelry	Comparing different options within my budget is difficult	I need personalized recommendations based on my budget and preferences	Confident and organized about my spending decisions
