| <b>Project Name</b>  | PocketSmart AI – Your Smart Budget & Recommendation System |
| <b>Maximum Marks</b> | 5 Marks                                                    |

### Functional Features Overview:

| S.No | Feature Name           | Feature Description                                           | Module / Component    | Status (Done / In Progress / Pending) | Marks Contribution |
|------|------------------------|---------------------------------------------------------------|-----------------------|---------------------------------------|--------------------|
| 1    | User Registration      | Users can create an account securely.                         | Authentication        | Done                                  | 1                  |
| 2    | User Login             | Users can log in using their credentials.                     | Authentication        | Done                                  | 1                  |
| 3    | AI Recommendations     | Provides personalized recommendations based on user needs.    | AI Module             | Done                                  | 1                  |
| 4    | Home Planner           | Suggests suitable home interior ideas.                        | Recommendation Module | Done                                  | 1                  |
| 5    | Party Planner          | Provides recommendations for party planning and requirements. | Recommendation Module | Done                                  | 1                  |
| 6    | Jewelry Planner        | Suggests suitable jewelry based on preferences and occasion.  | Recommendation Module | Done                                  | 1                  |
| 7    | Recommendation History | Stores and displays previous recommendations.                 | History Module        | Done                                  | 1                  |
| 8    | Responsive Interface   | Provides a user-friendly interface across devices.            | UI Module             | Done                                  | 1                  |

### Feature Summary:

| Metric                     | Count / Value |
|----------------------------|---------------|
| Total Features Planned     | 8             |
| Total Features Implemented | 8             |
| Core / Must-Have Features  | 6             |

|                                    |   |
|------------------------------------|---|
| Additional / Nice-to-Have Features | 2 |
| Features Tested & Verified         | 8 |

**Feature Category Breakdown:**

| S.No | Category                  | Features in Category | Example Features                                            |
|------|---------------------------|----------------------|-------------------------------------------------------------|
| 1    | User Interface (UI)       | 4                    | Home Planner, Party Planner, Jewelry Planner, Responsive UI |
| 2    | Backend / Logic           | 2                    | Recommendation Logic, History Management                    |
| 3    | Database / Storage        | 1                    | User & History Data                                         |
| 4    | API / Integration         | 1                    | AI Recommendation API                                       |
| 5    | Security / Authentication | 2                    | Registration, Login                                         |
